Career Objective

With an entrepreneurial background and a foundation in mathematics, I'm currently building my skills in Power BI, Python, Excel, SQL, and ERP implementation to drive business benefits. I aim to apply these skills in a dynamic environment to support data-driven decisions and continue growing in the field of analytics.

Internship Experience

Silver Touch Technologies Limited – Business Consultant

Dec 2024 – Present

- Research and identify client pain areas, proposing tailored business solutions.
- Involved in ODOO ERP implementation through data cleaning, analysis, and Excel-based reporting.
- Conducted gap analysis to optimize processes across Sales, Purchase, Inventory, and Account modules.

Adani Energy Solution Limited – Data Analyst

Jan 2024 – July 2024

- Skill Matrix Application for Skill Gap Analysis Using Power App, Power Automate, Power BI, and Excel.
- Human Resource Dashboard and Report creation using Power BI Desktop and Service.
- Bidding to LOA Transmission Line Project tracker using Excel VBA and Power BI.

Education

Adani Institute of Digital Technology Management

2023 - 2025

- PGDM in Big Data Analytics

Rajasthan University

2014 - 2017

- Bachelor of Science in Mathematics

Projects

Statistical Analysis of the Chicago School Dataset Using R

- Multilinear regression model, ANOVA, and hypothesis testing to analyze factors affecting student performance.
- Enhanced statistical analysis skills through real-world educational data

Admission Counselor Chatbot Using Python.

- Built an AI chatbot to handle admission queries using NLP and Deep Learning.
- Reduced staff load by classifying queries into intents with a trained neural network

Analyzing Sales Dataset using Power BI.

- Designed and developed an interactive sales report for a Superstore using Power BI.
- Visualized key metrics such as total sales, profit margins, and customer segmentation across different regions

Exploratory Data Analysis on Airbnb Dataset using Python.

- Proficiency in data cleaning and preparation to create compelling visualizations.
- Developed the ability to identify trends and make data-driven decisions

Analyzing the Global YouTube dataset using Power BI.

- An interactive Power BI dashboard using a global YouTube dataset to analyze video and channel performance.
- Insights on top videos, audience engagement, and content trends across countries and categories.

Work Experience

My Health Meal (Startup)

Marketing and Customer Relation Management

Jan 2020 - Aug 2021

Key Tasks:

- Tracked inventory trends and performed gap analysis to reduce waste and optimize stock levels.
- Analyzed purchase and sales data using Excel to identify best-selling meals and peak demand periods.
- Monitored customer retention, churn rate, and engagement to refine marketing strategies with gyms and trainers.

Build Hope Infrastructure Pvt. Ltd.

Procurement and Supervising the Construction Project

Oct 2017 - Jan 2020

Key Tasks:

- Maintained procurement logs and delivery schedules in Excel to ensure timely material availability.
- Track subcontractor performance, project timelines, and resource allocation.
- Analyzed vendor pricing trends and purchase history to negotiate cost-effective procurement deals.
