Career Objective

Leveraging my entrepreneurial experience and a background in construction, I am currently honing my skills in Power BI, Python, and SQL for data analysis. Aspiring to apply my analytical proficiency in a dynamic setting, I am keen to contribute innovative solutions and drive data-driven decision-making, fostering my growth in the field of data analytics.

Internship Projects

Adani Energy Solution Limited

Skill Gap Analysis

April - July 2024

Learnings:

- Leveraging Power Apps, Power Automate, Power BI, SharePoint, and Excel demonstrated the importance of integrating Microsoft tools for creating cohesive and functional applications.
- Using SharePoint lists, Excel, and Power Automate showcased the value of structured data handling and automated workflows to enhance efficiency and ensure real-time updates.
- Implementing Power BI for visualization stressed the importance of clear and insightful data presentation for informed decision-making and strategic planning in Learning and Development.

HR Dashboard Automation

Jan - March 2024

Learnings:

- Comprehensive Exposure: Gained hands-on experience in all facets of HR, including recruitment, talent management, employee engagement, and performance evaluation.
- Analytics Proficiency: Developed a strong skill set in creating HR analytics dashboards, utilizing tools such as Power BI. Successfully translated complex HR data into visually compelling and actionable insights for strategic decision-making.
- Collaborative Problem-Solving: Worked collaboratively with HR teams, fostering effective communication and problem-solving skills in a professional environment.
